### Open source software

I've contributed to a number of open source software projects. I've made substantial contributions to:

- **StatsModels.jl**: Primary maintainer and developer of StatsModels.jl, the statistical modeling package for the Julia language, which provides a familiar "formula language" for specifying regression models, contrast coding for categorical variables, etc.
- **MixedModels.jl**: Mixed-effects regression in Julia.
- **Gadfly.jl**: Data visualization in Julia, based on the grammar of graphics.

And contributed minor bug fixes and improvements to **Weave.jl** (knitr-like functionality for Julia), **latexdiff**, **lolcommits**, a node.js **mturk** API, and **FAAV/FAVE**.
