## Service

### Statistics outreach

I've worked to advance statistical literacy among cognitive scientists, psychologists, and linguists, via presentations at workshops and tutorials on statistical methods.

- 2016–2018 Weekly statistics workshops for Princeton Neuroscience Institute graduate students and postdocs (jointly with Mike Shvartsman)
- 2014 Tutorial on simulation-based methods for understanding mixed models. *SST 2014 Tutorial: Regression and mixed effects models*
- 2013 Co-organized UR BCS Department statistics and data analysis working group with Steve Piantadosi.
- 2011 *Preparing data for analysis using R*, presentation with Alex B. Fine at University of Rochester BCS workshop on mixed-effects regression analysis for cognitive scientists.
- 2010 *ANOVA and Mixed-Effects Models in R for Language Scientists*, presentation at University of Maryland Linguistics Dept. Winter Storm language sciences workshop.

### Open source software

I've contributed to a number of open source software projects. I've made substantial contributions to:

- **StatsModels.jl**: Primary maintainer and developer of StatsModels.jl, the statistical modeling package for the Julia language, which provides a familiar “formula language” for specifying regression models, contrast coding for categorical variables, etc.
- **Gadfly.jl**: Data visualization in Julia, based on the grammar of graphics.

And contributed minor bug fixes and improvements to **Weave.jl** (knitr-like functionality for Julia), **latexdiff**, **lolcommits**, a node.js **mturk** API, and **FAAV/FAVE**.
